Drip Tray

Product information

Manufactured in England from tough hydrocarbon resistant plastic, the drip tray is suitable for both saloon and formula cars. It is ideal for keeping the floor clean and safe.

TRS' drip tray meets the new circuit requirements for protecting the environment and is very easy to wipe clean following use. It can also be used for other workshop applications such as a parts cleaning tray.

Measuring 117cm x 40cm x 4cm the motorsport drip tray will cover both the engine and gearbox on a FF1600. Weighs 1.9Kg and will not be blown away while outside. Available in black only

Features:

• 117cm x 40cm x 4cm
• Keeps floor clean and safe
• Manufactured from tough hydrocarbon resistant plastic
• Meets new circuit requirements for protecting the environment
