

Roof Vent Carbon Fibre

Product information

Made in England This high quality hand made Carbon fibre roof vent features two directional air vents and incorporates a water drain. It is manufactured in the UK by hand using traditional wet lay, but using the latest generation of carbon weave for strength and durability. Excellent for cooling hot cockpits and is suitable for rally, race and track day cars.

Features:

- Carbon roof vent
- Two directional air vents
- Water drain
- Filter system
