Arm Restraints

Arm Restraints

- ▶ Ideal for restraining arms in open cockpits
- ▶ Attaches to harness straps
- ▶ Velcro securing system around drivers wrists
- ▶ SFI approved upon request

Used in formula, sportsproto and saloon cars to help restrain arms and prevent injury when cars roll over. The arm restraint is designed to attach to the harness and velcros around drivers wrists. Fully adjustable.

SFI approved can be provided upon request. Red, blue or black are standard colours available from stock.
