Door Handle Pull

Door Handle Pull

- ▶ Interior door handle pull
- ▶ 1400KG fade resistant webbing
- ▶ Overall length 25cm
- ▶ Loop diameter 13cm
- ▶ Available in a range of colours

Made in England. TRS' adjustable fabric tow loops are the original and still the best adjustable tow loops available. They have the strongest break strength, crucial when recovering cars from gravel traps, and utilise permanently dyed webbing for strong bold long lasting non-fade colours.

All tow loops are MSA compliant to Blue Book rule Q19.1.3 and are suitable for front or rear fitment to all car types. The adjustment range is 16cm - 60cm using pinch plates. Loop diameter is 13cm and the steel mounting plate hole centre ID is 12.5mm.

Red, blue, black and orange tow loops are produced using 5000kg break strength webbing. Yellow, green, and silver tow loops utilise 3000kg webbing. Warning - web tow loops should be kept clear of hot exhausts.
